Lost Scotch Collection

Like all businesses, over the years Scotch distilleries do close. The global recession of the early 80's was particularly devastating to the Scotch whiskey industry with many closures. Also, as beverage companies have merged and gotten bigger they have closed older facilities with greater operating expenses regardless of the quality of the product. Lowland Scotches in particular fell out of favor with blenders and most were closed in the early 80's. This was before the current growth in single malts and few had distillery bottlings. It is rare to find any of these Scotches today and even rarer still to find a distillery bottling. With every cask of Rosebank or Banff that gets bottled, potential new bottlings from silent distilleries become rarer - and therefore more expensive. Ashley's has scoured sources all over the State to find these lost bottles of Scotch. When they are gone they are gone.
